

Pack401 Horizontal Wrapper

High-Speed Bar Wrapper

The Pack401 Wrapper extends the performance of Bosch wrappers to speeds up to 80 meters per minute, by combining proven technology and application know-how from Bosch Packaging Technology companies around the world. The Pack401 provides high-speed performance for semi and fully automatic solutions.

One design globally delivered. The Pack401 marks the next generation of Bosch packaging machines that are available globally and supported locally. Strengthen your company's global manufacturing operation by partnering with a truly global machine supplier.

The machinery shown herein may have had guards removed for illustrative purposes. NEVER operate this machinery without all guards in place and all safety features in original working condition. ALWAYS refer to the operator's manual, or contact our sales support for additional information. Specifications subject to change without notice.

Service

This machine is designed with the fewest number of parts possible to reduce maintenance. When maintenance is needed, several Bosch Service Hubs worldwide ensure a local supply of spare parts and support are available quickly.

Training

Certified training programs are offered to ensure fast start-up and increase productivity.

Fast

Runs at film speeds up to 80 m/min (3150"/min) or up to 500 packages per minute.

Reliable

Features the latest in fin-seal technology utilizing gap control resulting in consistent, precise seal integrity.

Efficient

The standard dual spindle backstand with power feed roller allows for full automation. New options provide improved splicing, cutting, auto tracking and tighter cut-offs. Specially designed for both high-speed cold seal and heat seal applications.

Modular

As requirements change, the Pack401 can grow with your business. The electrical enclosure has space to support integrated modular applications such as robotics, secondary packaging and product distribution systems.
